

Bioproduction

# CGMP Chemicals & Services Savings Program

## Stretch your budget when combining your chemical purchases with warehouse storage and services

Whether you're entering preclinical trials or ready to commercialize, our CGMP Chemicals & Services Savings Program offers a discount to customers who combine their production chemical purchases with a personalized storage and services package.

### Protect your bottom line

The CGMP Chemicals & Services Savings Program allows your production chemical purchases to work harder for you. By purchasing production chemicals through Thermo Fisher Scientific over a 12-month period, you can unlock additional savings on CGMP-compliant services.

The more production chemicals you purchase, the greater the discount you can receive on CGMP warehousing and other value-added supply chain services.

### Program features

- Effective in 12-month increments
- Flexibility to move between tiers as bioprocessing needs change\*
- Competitive CGMP storage rates

\* Per annual review process.

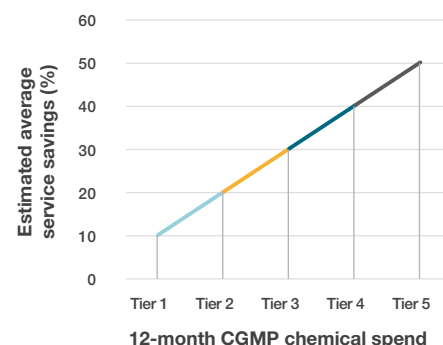

Figure 1. Discounts grow with each chemical purchase tier.

## Ready to receive your combined savings estimate?

Fill out the fields below with your projections to have a Thermo Fisher technical specialist calculate how much your company can save when you combine your CGMP chemical purchases with supply chain services.

### Identify your 12-month CGMP chemical, process liquid, and buffer expenditure

#### Current expenditure

\$

#### New projected expenditure

\$

### Determine your storage type and pallet amounts required per month

#### Materials procured and stored at a Thermo Fisher CGMP warehouse

- Non-hazardous: ambient pallet spaces/month
- Non-hazardous: 2–8°C pallet spaces/month
- Hazardous: pallet spaces/month  
If possible, fill out by hazardous classification:
  - Acids: pallet spaces/month
  - Bases: pallet spaces/month
  - Flammables: pallet spaces/month
  - Oxidizers: pallet spaces/month
  - Poisons: pallet spaces/month

#### Materials procured and stored by you

- Non-hazardous: ambient pallet spaces/month
- Non-hazardous: 2–8°C pallet spaces/month
- Hazardous: pallet spaces/month  
If possible, fill out by hazardous classification:
  - Acids: pallet spaces/month
  - Bases: pallet spaces/month
  - Flammables: pallet spaces/month
  - Oxidizers: pallet spaces/month
  - Poisons: pallet spaces/month

### Select your CGMP value-added services

#### CGMP Distribution Services

CGMP storage and handling

#### Assurance of Supply Service

Extended storage (more than 90 days) for consigned inventory

#### Production Ready Services

Material inspection and labeling

Material sampling

Poly-palletization

#### Warehouse Sustainability Services

Container recycling and disposal

Note: Availability of CGMP chemical services may vary by country. For specific service capabilities, please discuss with your Thermo Fisher technical specialist.
